How to Solve Anagram Magic Square

Think of an anagram for the word printed in each box. The anagram will be the answer to one of the numbered clues below the diagram. Put the number of that clue into the small square of the matching box and write the anagram on the dash. The numbers you put into each row and each column will add up to 65. Write the first letter of each anagram on the correspondingly numbered dash at the bottom of the page. Presto! The Anagram Magic saying will appear. We have filled in one anagram, its clue number, and placed its first letter on the correct dash at the bottom of the page to start you off.

Caution: The solution is included at the bottom of the page.
