How to Solve Word Games Puzzles

The solution to a Word Games Puzzle is a message reading from left to right, line by line, in the diagram. Word endings are not indicated in the diagram, and a word may continue from one line to the next.

There are four word games for each puzzle. Fill in the word game answers one letter per dash. The letter and number under a dash tell you where the letter you wrote on that dash is to be written in the diagram. For example, if K2 is under a dash, the letter on that dash goes in the second square in column K of the diagram.

You do not need to know all the word game answers to begin filling in the diagram. Some letters in the diagram are used more than once in the word games. Work back and forth between the diagram and the word games until the puzzle is solved.

Caution: The solution is included at the bottom of the page.
