

CRYPTOGRAM

A Cryptogram is a sentence in which one set of letters has been substituted for another. The words are in their right order, with a space after each. For example: A BIG CAT, M HWX UMY. Here M is substituted for A, H for B, W for I, etc. You can break the code by watching for the frequency of certain letters or the way they are grouped. You know that a single letter is usually A or I, that the word THE occurs very often in our language, as does AND. Try IS, IT, OF, and other common words when you find a group of two letters.

The answer is on the next page.

G E D J X X T P Z L T P T V E A P F T J X M F J X X L T

Q J I I R J D T , M X ' F J I Z J V F Q T X Z T T G X L T

L E X - U E R W T U U I T P J G U L M F Q T F X

K A F X E D T P F .
