How to Solve Zigzags

Zigzag puzzles are Word Seeks with an added challenge. The entries are found in the diagram in an unusual way. They do not read in straight lines; rather, each entry has one bend in it. Circle each word when you find it in the diagram and put a check in the small square next to the entry, as we did with AGREE. Words often overlap, and some letters may be used more than once. Note: not all the letters in the diagram will be used.

Caution: The solution is included at the bottom of the page.
