How to Solve Letterboxes

Can you find the correct places for the words in the word list? The starting letters for all the words are given in the circled squares. These letters may also be used as parts of other words because of overlapping or crossing. The words read in a straight line and in all directions—forward, backward, up, down, and diagonally. Do not pass over a black square as you are solving. When the puzzle is completely solved, there will be a letter in every space.

Caution: The solution is included at the bottom of the page.
